

## Committee Discussion

# Promotion

## Physical Activity

Population

Prevention

# Promotion

- Promotion of physical activity

# Physical Activity

- Sedentary behavior
  - Exposure

- Youth
- Aging
- Populations with chronic conditions

Brain health

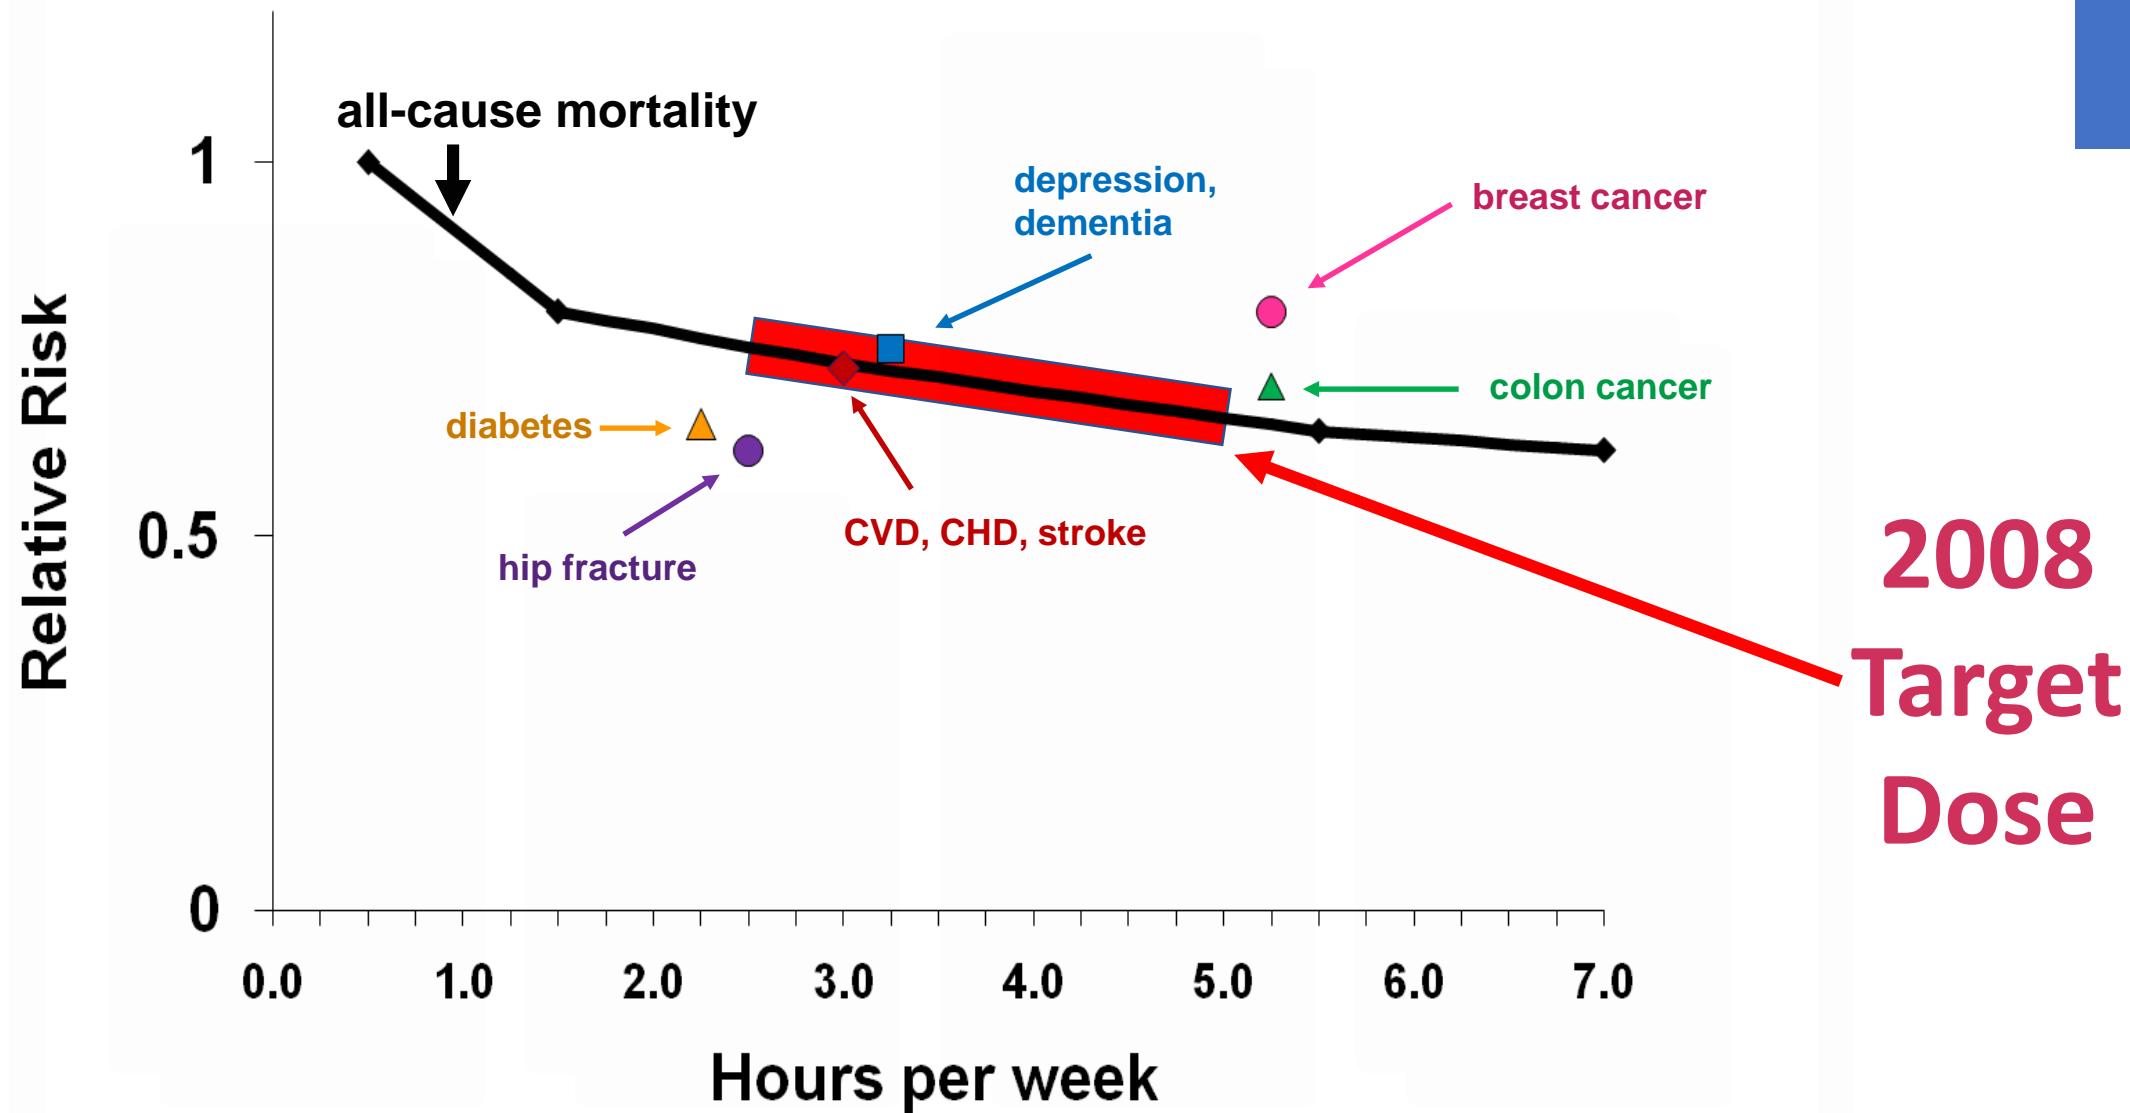

- Cancer
- Cardiometabolic health and weight status

# Population

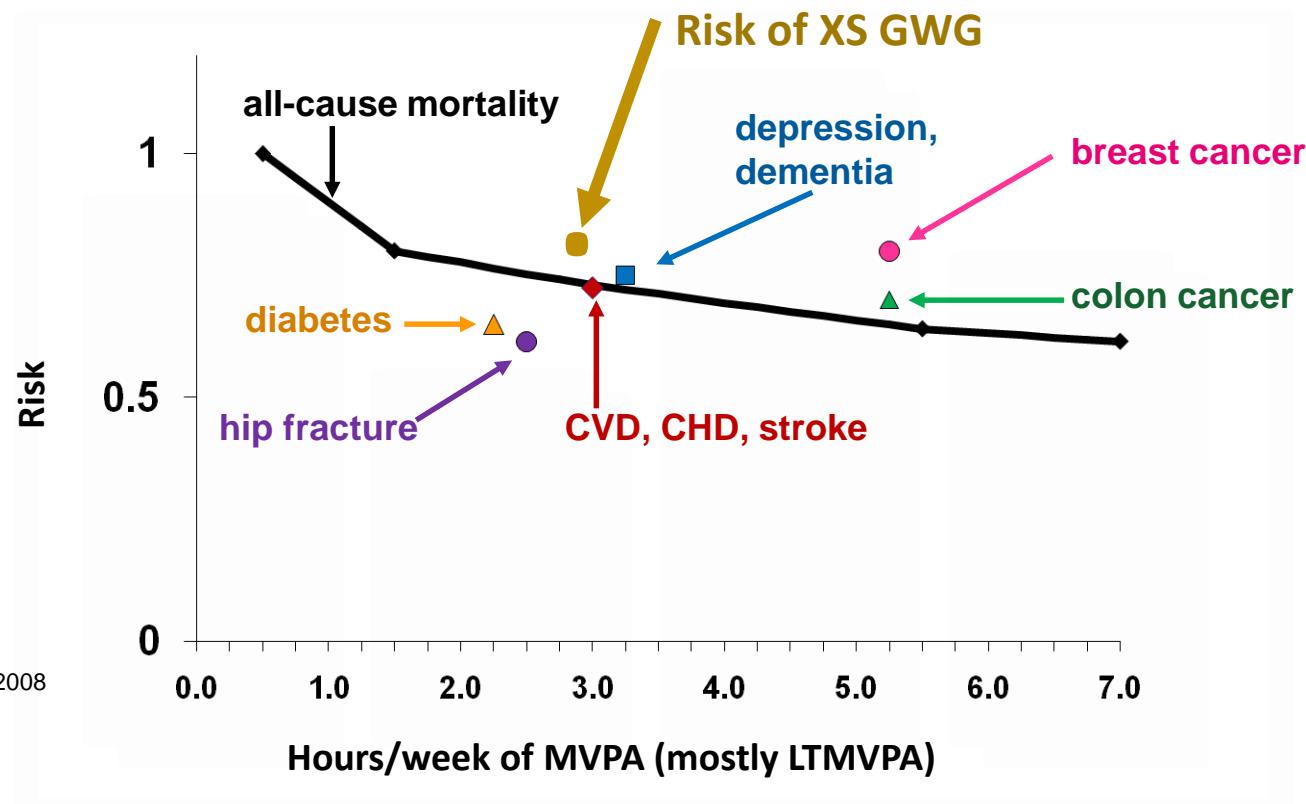

# Prevention

# All-cause mortality and disease-specific data points by hours per week of self-reported MVPA

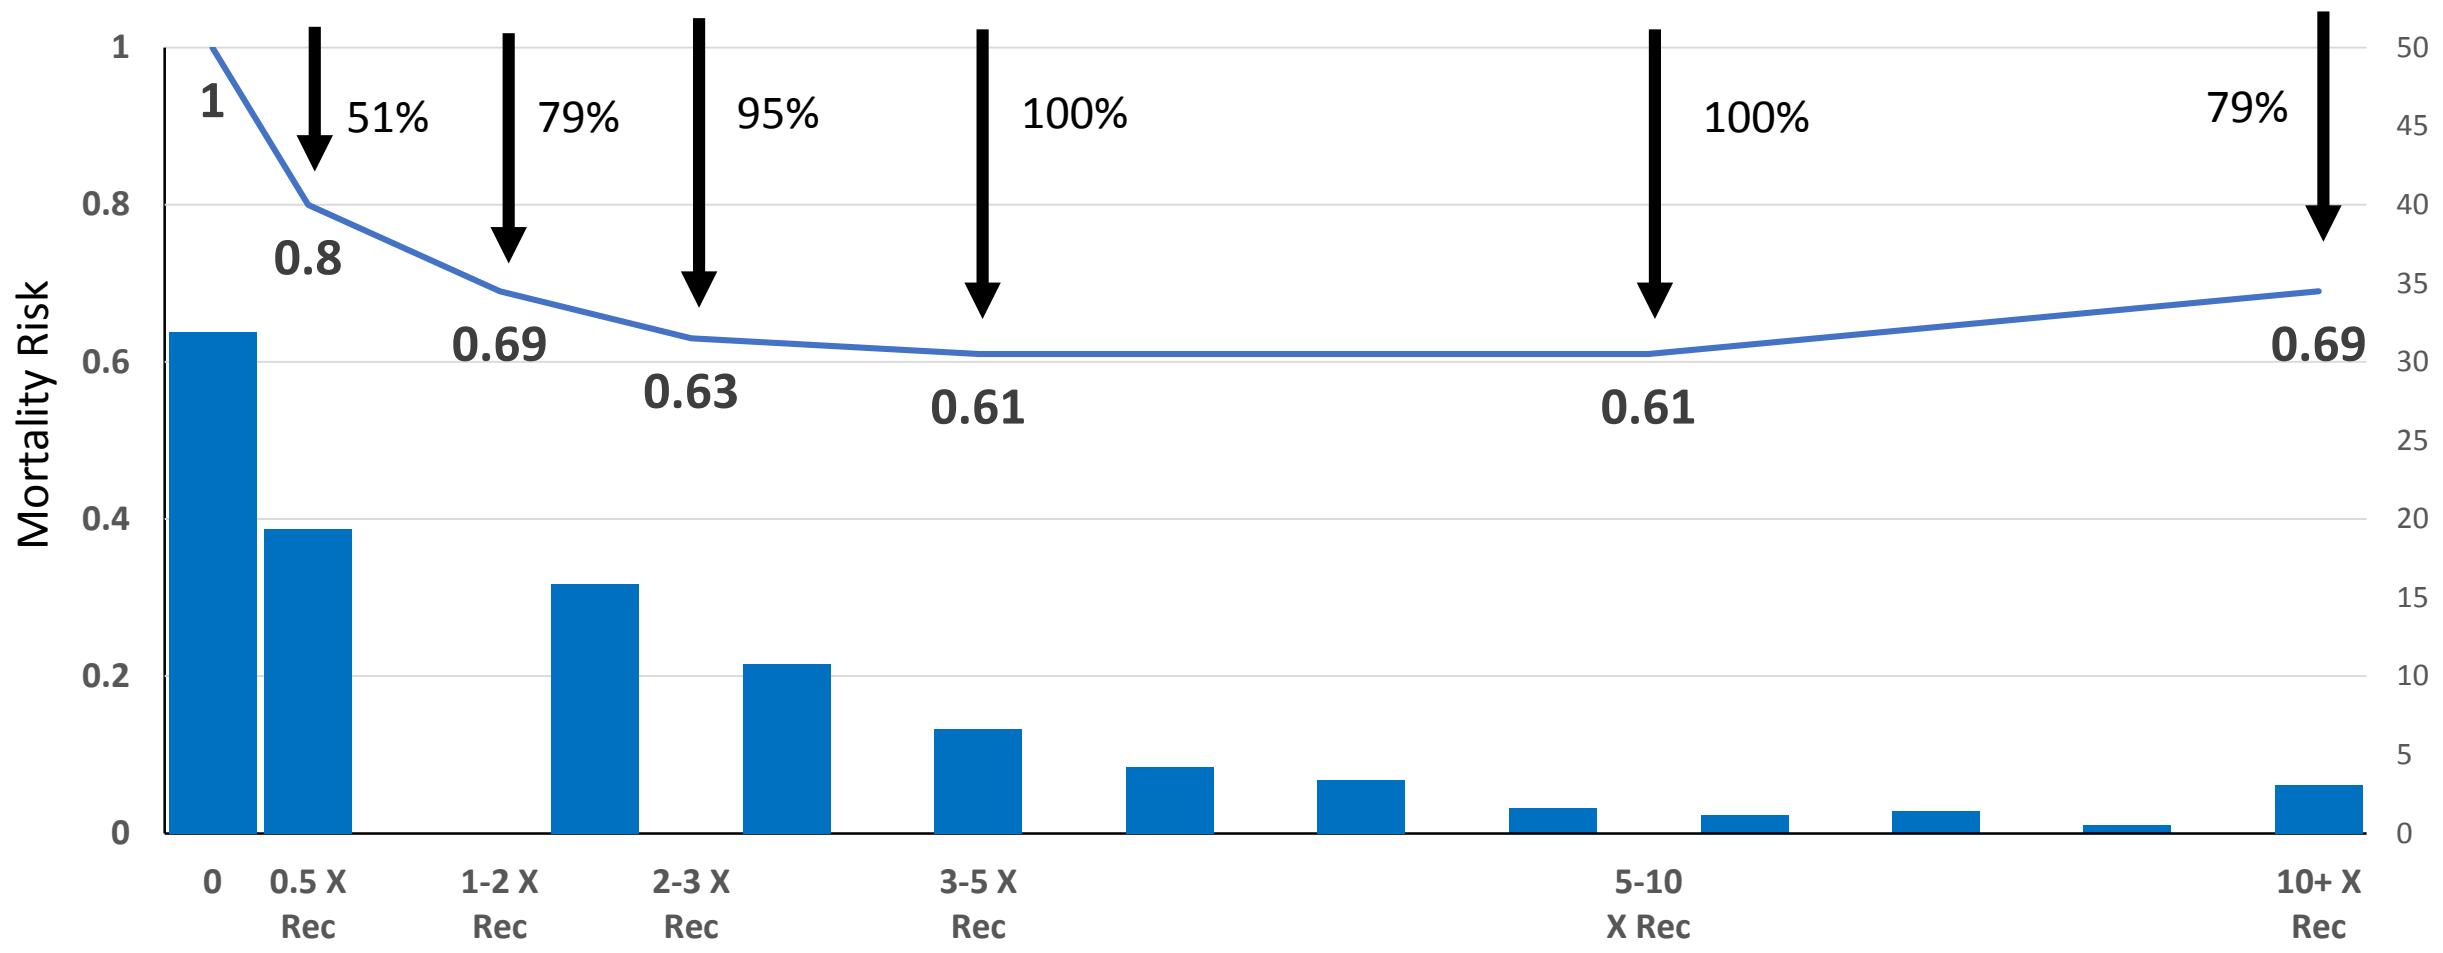

Physical Activity  
Guidelines  
Advisory  
Committee  
2018

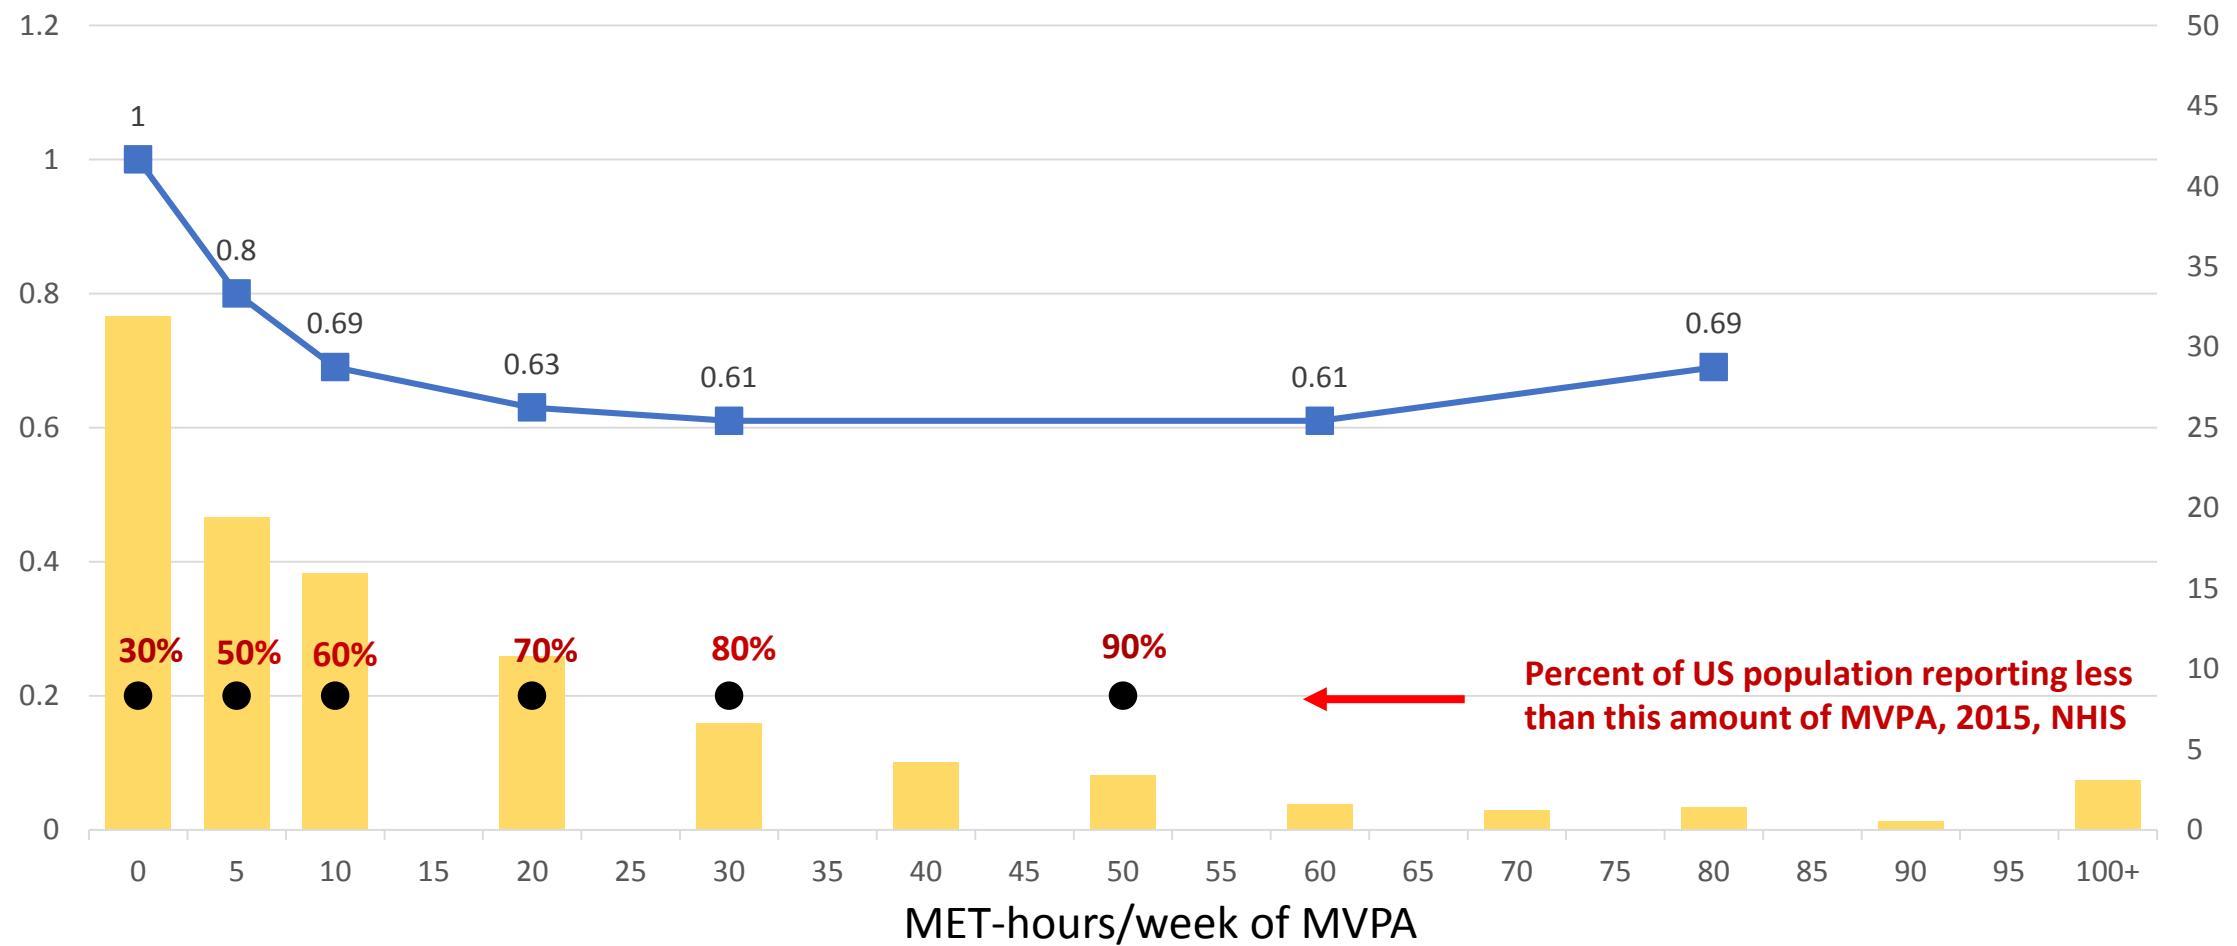

# Dose and dose-response curves

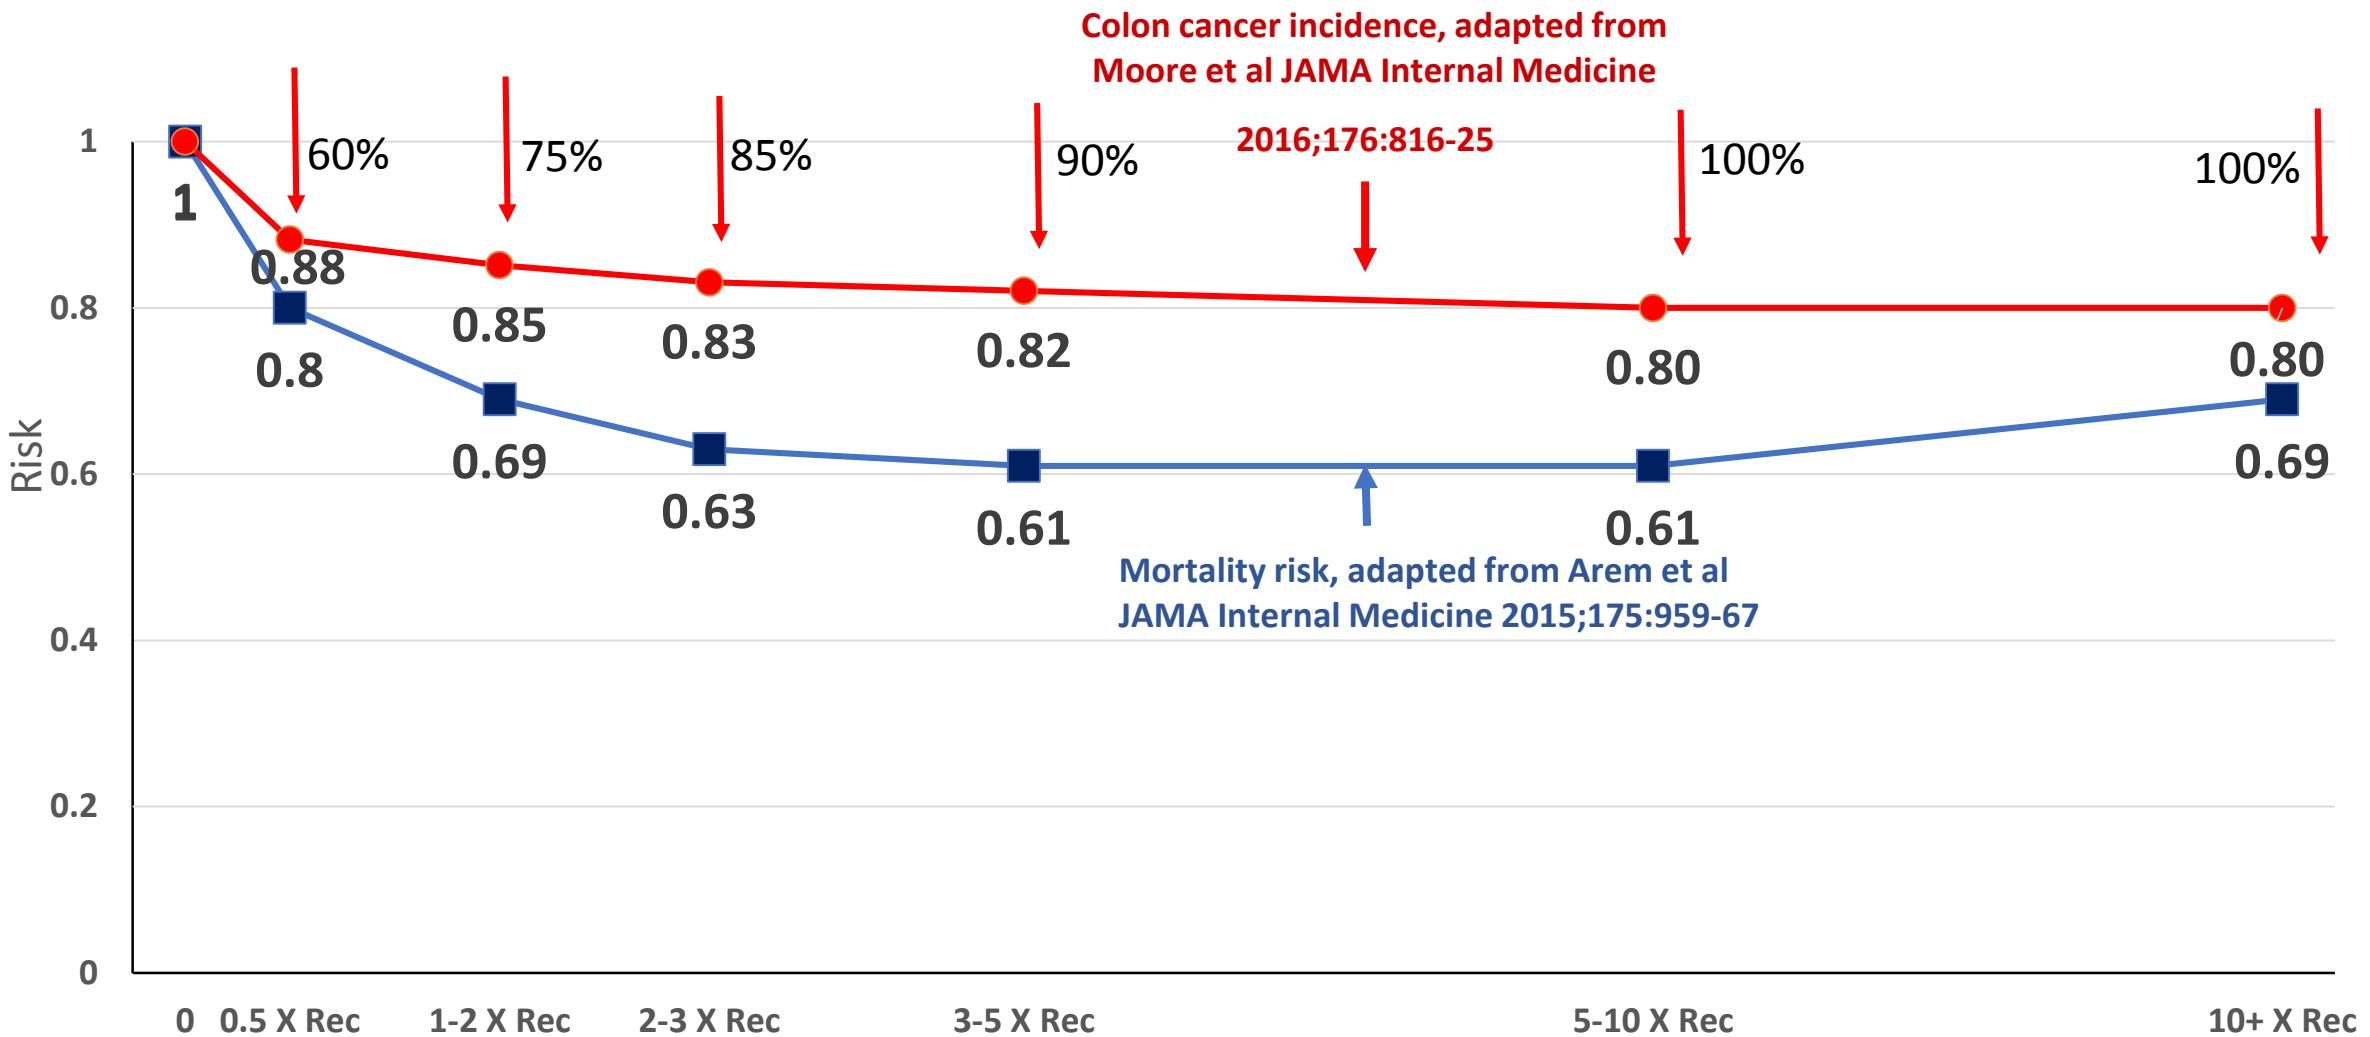

# Percent of maximum potential reduction in hazard ratio by multiples of recommended PA

# Risk of all-cause mortality by volume of leisure-time MVPA and population distribution of MVPA

# Percent of maximum potential reduction in hazard ratio by multiples of recommended PA

Percent of Maximum Reduction in Risk by volume of self-reported MVPA			
Volume of Reported MVPA	All-Cause Mortality	Colon Cancer Incidence	Diabetes Incidence
Baseline	0%	0%	0%
~0.5 X Rec	51%	60%	?
~1-2 X Rec	79%	75%	?
~2-3 X Rec	95%	85%	?
~4 X Rec	100%	90%	?
~7.5 X Rec	100%	100%	?
~10 X Rec	79%	100%	?

Rec = 150 min/day self-reported MVPA
